The Concise APA Handbook Paul Chamness Iida,Rachael Ruegg,Mark de Boer,Naoko Araki,Mary Frances Agnello,2020-07-01 Most students struggle with learning how to find references, use them effectively, and cite them

appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original *The Concise APA Handbook*, which has been updated for APA 7th edition, which was issued in the fall, 2019.

In structure, the book is divided into a number of well-defined parts, each dealing with a major element of the research process and combining to produce a step-by-step guide for the student embarking on a major piece of undergraduate research.--BOOK JACKET.

The Opioid Epidemic Yngvild Olsen, Joshua M. Sharfstein, 2019 The opioid epidemic is responsible for longest sustained decline in U.S. life expectancy since the time of World War I and the Great Influenza. In 2017, nearly 50,000 Americans died from an opioid overdose - with an estimated 2 million more living with opioid addiction every day. *The Opioid Epidemic: What Everyone Needs to Know*(R) is an accessible, nonpartisan overview of the causes, politics, and treatments tied to the most devastating health crisis of our time. Its comprehensive approach and Q&A format offer readers a practical path to understanding the epidemic from all sides: the basic science of opioids; the nature of addiction; the underlying reasons for the opioid epidemic; effective approaches to helping individuals, families, communities, and national policy; and common myths related to opioid addiction. Written by two expert physicians and enriched with stories from their experiences in the crosshairs of this epidemic, this book is a critical resource for any general reader -- and for the individuals and families fighting this fight in their own lives.

Digital Literacies for Learning Allan Martin, Dan Madigan, 2006 In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, *Literacies in the Digital Age*, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment.

In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

Singular Texts/plural Authors Lisa S. Ede,Andrea A. Lunsford,1992 Why write together? the authors ask. They answer that question here, in the first book to combine theoretical and historical explorations with actual research on collaborative and group writing. Lisa Ede and Andrea Lunsford challenge the assumption that writing is a solitary act. That challenge is grounded in their own personal experience as long-term collaborators and in their extensive research, including a three-stage study of collaborative writing supported by the Fund for the Improvement of Post-Secondary Education. The authors urge a fundamental change in our institutions to accommodate collaboration by radically resituating power in the classroom and by instituting rewards for collaborative work that equal rewards for single-authored work. They conclude with the injunction: Today and in the twenty-first century, our data suggest, writers must be able to work together. They must, in short, be able to collaborate.
