Qualitative Data Analysis with NVivo Patricia Bazeley,2007-04-12 `In plain language but with very thorough detail, this book guides the researcher who really wants to use the NVivo software (and use it now) into their project. The way is lit with real-project examples, adorned with tricks and tips, but it's a clear path to a project' - Lyn Richards, Founder and Non-Executive Director, QSR International Doing Qualitative Data Analysis with NVivo is essential reading for anyone thinking of using their computer to help analyze qualitative data. With 15 years experience in computer-assisted analysis of qualitative and mixed-mode data, Patricia Bazeley is one of the leaders in the use and teaching of NVivo software. Through this very practical book, readers are guided on how best to make use of the powerful and flexible tools offered by the latest version of NVivo as they work through each stage of their research projects. Explanations draw on examples from her own and others' projects, and are supported by the methodological literature. Researchers have different requirements and come to their data from different perspectives. This book shows how NVivo software can accommodate and assist analysis across those different perspectives and methodological approaches. It is required reading for both students and experienced researchers alike.

Education for Life and Work National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Board on Testing and Assessment,Committee on Defining Deeper Learning and 21st Century Skills,2013-01-18 Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers,

parents, volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as 21st century skills. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking. These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century summarizes the findings of the research that investigates the importance of such skills to success in education, work, and other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.

The Government will: cap the Retail Prices Index in business rates to 2% in 2014-15 and extend the doubling of Small Business Rate Relief to April 2014; will provide a business rate discount of £1,000 in 2014-15 and 2014-16 for retail properties with a rateable value of up to £50,000 and a 50% discount from business rates for new occupants of previously empty retail premises for 18 months; abolish National Insurance Contributions for under 21 year olds on earnings up to £813 per week; remove cap on higher education student numbers; announce further reforms to make the most of the UK's science base; introduce a new tax relief for shale gas, and increase support for employee ownership and the creative industries; improve the UK's infrastructure with the National Infrastructure Plan 2013; and take further action to increase housing supply and support home ownership. Fuel prices will be frozen and the impact of policies on energy bills will be reduced. The average increase in rail fares will be capped. Married couples & civil partners will be allowed to transfer £1,000 of their income tax personal allowance to their spouse where neither is a higher rate taxpayer.

Discovery of Grounded Theory Barney Glaser,2017-07-05 Most writing on sociological method has been concerned with how accurate facts can be obtained and how theory can thereby be more rigorously tested. In *The Discovery of Grounded Theory*, Barney Glaser and Anselm Strauss address the equally important enterprise of how the discovery of theory from data?systematically obtained and analyzed in social research?can be furthered. The discovery of theory from data?grounded theory?is a major task confronting sociology, for such a theory fits empirical situations, and is understandable to sociologists and laymen alike. Most important, it provides relevant predictions, explanations, interpretations, and applications. In Part I of the book, *Generation Theory by Comparative Analysis*, the authors present a strategy whereby sociologists can facilitate the discovery of grounded theory, both substantive and formal. This strategy involves the systematic choice and study of several comparison groups. In Part II, *The Flexible Use of Data*, the generation of theory from qualitative, especially documentary, and quantitative data is considered. In Part III, *Implications of Grounded Theory*, Glaser and Strauss examine the credibility of grounded theory. *The Discovery of Grounded Theory* is directed toward improving social scientists' capacity for generating theory that will be relevant to their research. While aimed primarily at sociologists, it will be useful to anyone interested in studying social phenomena?political, educational, economic, industrial? especially if their studies are based on qualitative data.

The Real North Korea Andrei Lankov,2015 In *The Real North Korea*, Lankov substitutes cold, clear analysis for the overheated rhetoric surrounding this opaque police state. Based on vast expertise, this book reveals how average North Koreans live, how their leaders rule, and how both survive

Marine Anthropogenic Litter Melanie Bergmann,Lars Gutow,Michael Klages,2015-06-01 This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of

marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

Deadly Voyages Veronica Fynn Bruey, Steven W. Bender, 2019-12-16 *Deadly Voyages: Migrant Journeys across the Globe* explores the burdens and impact of perilous migration, while considering which laws, policies, practices, and venues might establish empathy and protection for migrants. This interdisciplinary volume envisions and calls for a transformation in migration policy, motivated by the common goal of drastically reducing the peril migrants face when compelled to make their treacherous journeys. All contributors to this volume agree on the inadequacy of current approaches and the dire need for change in global migration law and policy. Therefore, the book seeks to inform, educate, persuade, and facilitate newer or less-heard perspectives, toward wider participation and influence within the forced migration policy debate. Guided by the famous advice of Karl Marx that the point should be changing the world rather than merely analyzing or interpreting it, the contributors suggest practical measures to fix the current gap in responses to migrant peril, along with strategies for diagnosing, countering, and promoting human dignity and social justice, with the aim of preventing future deaths and injuries in migrant journeys across the globe.

Everyday Exposure Sarah Marie Wiebe,2016-10-13 Near the Ontario-Michigan border, Canada's densest concentration of chemical manufacturing surrounds the Aamjiwnaang First Nation. Living in the polluted heart of Chemical Valley, Indigenous community members express concern about a declining rate of male births in addition to abnormal incidences of miscarriage, asthma, cancer, and cardiovascular and respiratory illnesses. As this book reveals, Canada's dark legacy of inflicting harm on Indigenous bodies persists through a system that fails to adequately address health and ecological suffering in First Nations' communities like Aamjiwnaang. *Everyday Exposure* uncovers the systemic injustices faced on a daily basis in Aamjiwnaang. Exploring the problems that Canada's conflicting levels of jurisdiction pose for the creation of environmental justice policy, analyzing clashes between Indigenous and scientific knowledge, and documenting the experiences of Aamjiwnaang residents as they navigate their toxic environment, this book argues that social and political changes require an experiential and transformative "sensing policy" approach, one that takes the voices of Indigenous citizens seriously.
