Dr. Michael Guillen, known to millions as the science editor of ABC's Good Morning America, tells the fascinating stories behind five mathematical equations. [In the Sea There Are Crocodiles](#) Fabio Geda, 2011-07-07 I read somewhere that the decision to emigrate comes from a need to breathe. The hope of a better life is stronger than any other feeling. My mother decided it was better to know I was in danger far from her; but on the way to a different future, than to know I was in danger near her; but stuck in the same old

fear. At the age of ten, Enaiatollah Akbari was left alone to fend for himself. This is the heartbreaking, unforgettable story of his journey from Afghanistan to Italy in an attempt to find a safe place to live.

Accabadora Michela Murgia, 2011-09-29 One of Elena Ferrante's best 40 books by female writers When Maria, the fourth child of a widow, is adopted by the old and childless Bonaria Urrai, her life is instantly transformed - she finally has the love and affection she craves. But her new 'soul mother' is keeping something hidden from her, a secret life that is intimately bound-up with Sardinia's ancient traditions and customs. Midwife to the dying, easing their suffering and sometimes ending it, she is revered and feared in equal measure as the village's Accabadora. Bonaria tries to shield the girl from the truth about her role as an angel of mercy, until, moved by the pleas of a young man crippled in an accident, she breaks her golden rule of familial consent. The consequences - for Bonaria, for Maria and for the whole village, are devastating - and cause a rift between the two women that can only be bridge by another death. Translated from the Italian by Silvester Mazzarella

Telephone Tales Gianni Rodari, 2020-09-08 Reminiscent of Scheherazade and One Thousand and One Nights, Gianni Rodari's Telephone Tales is many stories within a story. Every night, a traveling father must finish a bedtime story in the time that a single coin will buy. One night, it's a carousel that adults cannot comprehend, but whose operator must be some sort of magician, the next, it's a land filled with butter men who melt in the sunshine Awarded the Hans Christian Anderson Award in 1970, Gianni Rodari is widely considered to be Italy's most important children's author of the 20th century. Newly re-illustrated by Italian artist Valerio Vidali (The Forest), Telephone Tales entertains, while questioning and imagining other worlds.

The Leopard Giuseppe Tomasi Di Lampedusa, 1991-10-15 SOON TO BE A NETFLIX SERIES • “A majestic, melancholy, and beautiful novel” (The New Yorker), THE LEOPARD is one of the best-selling Italian novels of the twentieth century and an acclaimed masterpiece of world literature. This beautiful hardcover edition, translated by Archibald Colquhoun, also includes two short stories and a brief memoir of the author’s childhood. Set in Sicily in the 1860s, during the tumult of Italian unification, THE LEOPARD tells the spellbinding story of a decadent, fading aristocracy threatened by the approaching forces of revolution and democracy. Its author, Giuseppe Tomasi di Lampedusa, who was the last in a line of Sicilian princes, wrote the novel in the 1950s, inspired by the decline of his own family. Don Fabrizio Corbera, Prince of Salina, remains skeptical and stoic as he finds himself beset by civil war, social change, and his family’s loss of wealth and status. While his beloved nephew, Tancredi, more practical and flexible than he, joins the nationalist rebels and marries the ambitious daughter of a newly rich upstart, Don Fabrizio takes refuge in his love of astronomy, gazing at the unchanging stars while the world as he has known it crumbles around him. The dramatic sweep and richness of Lampedusa’s observation, his seamless intertwining of public and private worlds, and his sure grasp of human frailty imbue THE LEOPARD with its melancholy beauty and power. “No novel in Italian literature has aroused so much passion or caused so much argument... The book is more than the memorable invocation of a certain place in a certain epoch. It is a work of art that will survive, long after the last sad palaces of Palermo have gone, because it deals with the central problems of the human experience.” —from the Introduction by David Gilmour The genius of its author and the thrill it gives the reader are probably for all time.—The New York Times Book Review A masterwork . . . A superb novel in the great tradition and the grand manner.—Newsweek Everyman's Library pursues the highest production standards, printing on acid-free cream-colored paper, with full-cloth cases with two-color foil stamping, decorative endpapers, silk ribbon markers, European-style half-round spines, and a full-color illustrated jacket. Contemporary Classics include an introduction, a select bibliography, and a chronology of the

author's life and times.

Digital Technologies in Designing Mathematics Education Tasks Allen Leung,Anna Baccaglioni-Frank,2016-10-12

This book is about the role and potential of using digital technology in designing teaching and learning tasks in the mathematics classroom. Digital technology has opened up different new educational spaces for the mathematics classroom in the past few decades and, as technology is constantly evolving, novel ideas and approaches are brewing to enrich these spaces with diverse didactical flavors. A key issue is always how technology can, or cannot, play epistemic and pedagogic roles in the mathematics classroom. The main purpose of this book is to explore mathematics task design when digital technology is part of the teaching and learning environment. What features of the technology used can be capitalized upon to design tasks that transform learners' experiential knowledge, gained from using the technology, into conceptual mathematical knowledge? When do digital environments actually bring an essential (educationally, speaking) new dimension to classroom activities? What are some pragmatic and semiotic values of the technology used? These are some of the concerns addressed in the book by expert scholars in this area of research in mathematics education. This volume is the first devoted entirely to issues on designing mathematical tasks in digital teaching and learning environments, outlining different current research scenarios.

Protecting Your Internet Identity Ted Claypoole,Theresa Payton,2016-11-16 People research everything online - shopping, school, jobs, travel - and other people. Your online persona is your new front door. It is likely the first thing that new friends and colleagues learn about you. In the years since this book was first published, the Internet profile and reputation have grown more important in the vital human activities of work, school and relationships. This updated edition explores the various ways that people may use your Internet identity, including the ways bad guys can bully, stalk or steal from you aided by the information they find about you online. The authors look into the Edward Snowden revelations and the government's voracious appetite for personal data. A new chapter on the right to be forgotten explores the origins and

current effects of this new legal concept, and shows how the new right could affect us all. Timely information helping to protect your children on the Internet and guarding your business's online reputation has also been added. The state of Internet anonymity has been exposed to scrutiny lately, and the authors explore how anonymous you can really choose to be when conducting activity on the web. The growth of social networks is also addressed as a way to project your best image and to protect yourself from embarrassing statements. Building on the first book, this new edition has everything you need to know to protect yourself, your family, and your reputation online.

The Talking Horse and the Sad Girl and the Village Under the Sea Mark Haddon, 2006 That Mark Haddon's first book after *The Curious Incident of the Dog in the Night-Time* was a poetry collection perhaps came as a surprise to his legions of fans; that it is a collection of such virtuosity and range did not. The gifts so admired in Haddon's prose are in strong evidence here too - the humanity of his voices, the dark humour and the uncanny ventriloquism - but Haddon is also a writer of considerable seriousness, lyric power and surreal invention, and *The Talking Horse and the Sad Girl and the Village Under the Sea* combines bittersweet love-lyrics, lucid and bold new versions of Horace, comic set-pieces, lullabies, wry postmodern shenanigans (including a note from the official board of censors on 18 certificate poetry), and an entire John Buchan novel condensed to five pages. Consolidating Haddon's reputation as our most powerful myth-weavers and spell-makers, *The Talking Horse and the Sad Girl and the Village Under the Sea* also confirms him as one of the most outrageous and freewheeling imaginations at work in contemporary literature.
