Going Critical Joel S. Wit, Daniel B. Poneman, Robert L. Gallucci, 2004-04-19 A decade before being proclaimed part of the axis of evil, North Korea raised alarms in Washington, Seoul, and Tokyo as the pace of its clandestine nuclear weapons program mounted. When confronted by evidence of its deception in 1993, Pyongyang abruptly announced its intention to become the first nation ever to withdraw from the Nuclear Non-Proliferation Treaty, defying its earlier commitments to submit its nuclear activities to full international inspections. U.S. intelligence had revealed evidence of a robust plutonium production program. Unconstrained, North Korea's nuclear factory would soon be capable of building about thirty Nagasaki-sized nuclear weapons annually. The resulting arsenal would directly threaten the security of the United States and its allies, while tempting cash-starved North Korea to export its deadly wares to America's most bitter adversaries. In *Going Critical*, three former U.S. officials who played key roles in the nuclear crisis trace the intense efforts that led North Korea to freeze—and pledge ultimately to dismantle—its dangerous plutonium production program under international inspection, while the storm clouds of a second Korean War gathered. Drawing on international government documents, memoranda, cables, and notes, the authors chronicle the complex web of diplomacy—from Seoul, Tokyo, and Beijing to Geneva, Moscow, and Vienna and back again—that led to the negotiation of the 1994 Agreed Framework intended to resolve this nuclear standoff. They also explore the challenge of weaving together the military, economic, and diplomatic instruments employed to persuade North Korea to accept significant constraints on its nuclear activities, while deterring rather than provoking a violent North Korean response. Some ten years after these intense negotiations, the Agreed Framework lies abandoned. North Korea claims to possess some nuclear weapons, while threatening to produce even more. The story of the 1994 confrontation

Biocatalysis W.-D. Fessner, 2003-09-05 Here, leading contributors from the forefront of this exciting technology present authoritative and timely reviews on the state of the art of biocatalysis. They cover the whole spectrum from the discovery of novel enzymes - by modern screening, evolutionary or immunological approaches - through immobilization techniques for technical processes, to their use in the asymmetric synthesis of important target compounds.

Education, Economy & Society Salim Vally, Enver Motala, 2014 *Education, Economy & Society* is a compelling and

comprehensive antidote to the misconstrued nature of the relationship between education and society in South Africa. It provides a constructive critique of conventional discourses, but also alternative approaches to understanding the connections between education and the triple scourge of unemployment, inequality, and poverty. The book's contributors passionately argue that South African education finds its value and purpose in a focus on social justice, transformation, and democratic citizenship. The joy of education is to capture human imaginations and unleash their creativity towards a more humane and compassionate society. This rich resource explores the possibilities for a new pedagogy in post-school education and training through empirical research on skills, technology, and issues of employment on the shop floor; a critical analysis of the youth wage subsidy; and workers' education. The book will appeal to a wide audience including students and academics in the fields of industrial sociology, economics, adult education, further education and training, and those in youth development.
