Solution Focused Narrative Therapy Linda Metcalf, MEd, PhD, LMFT, LPC, 2017-03-01 Introduces a Powerful New Brief Therapy Approach This groundbreaking book is the first to provide a comprehensive model for effectively blending the two main postmodern brief therapy approaches: solution-focused and narrative therapies. It harnesses the power of both models—the strengths-based, problem-solving approach of SFT and the value-honoring and re-descriptive approach of Narrative Therapy—to offer brief, effective help to clients that builds on their strengths and abilities to envision and craft preferred outcomes. Authored by a leading trainer, teacher, and practitioner in the field, the book provides an overview of the history of both models and outlines their differences, similarities, limitations and strengths. It then demonstrates how to blend these two approaches in working with such issues as trauma, addictions, grief, relationship issues, family therapy and mood issues. Each concern is illustrated with a case study from practice with individual adults, adolescents, children, and

families. Useful client dialogue and forms are included to help the clinician guide clients in practice. Each chapter concludes with a summary describing and reinforcing the principles of the topic and a personal exercise so the reader can experience the approach first hand. Key Features: Describes how two popular postmodern therapy models are combined to create a powerful new therapeutic approach—the first book to do so Includes case studies reflecting the model’s use with individual adults, children, adolescents, and families Provides supporting dialogue and forms for practitioners Authored by a leading figure in SFT and its application in a variety of setting Presents an overview of the history of both models

The Solution-Focused Helper: Ethics and Practice in Health and Social Care Trish Walsh,2010-08-16 Walsh's book is not only thorough, thoughtful, and clearly written, it is also timely because as SF practice applications with their parallel knowledge bases continue to multiply, the questions Walsh addresses so competently are cutting edge for adopting a SF approach to practice in human services. Peter De Jong, Solution-focused Therapist, Trainer, and Consultant and Emeritus Professor of Social Work, Calvin College, USA Based in part on original research with over 50 practitioners, this absorbing book provides a practice model for solution-focused helping, developed from real-life experiences across a number of settings. The book begins by reviewing the original De Shazer and Berg practice model, establishing a case for change and then introduces a new concept for the solution-focused helper. Case examples are used to demonstrate the application of this new model in five different practice settings: Healthcare Learning disability Services for older people and end-of-life care Community development Services for globalised diverse communities Reflective exercises and research reviews are included

for each setting as well as sections on policy contexts and ethical dimensions. The Solution-Focused Helper will support students and practitioners who are already familiar with the basic concepts and principles of solution-focused work and who wish to develop their practice and deepen their knowledge.

Planet Grief Dipti Tait,2021-10-21 We all grieve. From the moment we are born into this cold, loud, bright world, we experience change and loss that can often threaten to overwhelm us, but - when managed well - can help mould us into our

strongest, most powerful selves. Grief is not only about death: it is part of our everyday lives. We are all grieving something. We grieve when our life changes – when meaningful relationships end, when we move house, change schools or jobs, and when our sense of identity and reality are under threat. We also grieve on a larger level – for a lost way of life and for our planet, particularly in these times of climate crisis, pandemic, fast-moving technology, misinformation and societal division. Grief can even be found in joy and is one of the most universal shared emotions, connecting people across the world in an act of love. In this surprisingly uplifting book, acclaimed grief therapist Dipti Tait draws on her own professional and personal experiences, her clients' stories and the neuroscience behind our emotions to redefine grief for our fast-paced lives and this sometimes alarming yet wonderful world we live in.

Contributors include experienced practitioners of play, art, music, movement and drama therapies, bibliotherapy, and integrative therapies, who describe step-by-step strategies for working with individual children, families, and groups. The case-based format makes the book especially practical and user-friendly. Specific types of stressful experiences addressed include parental loss, child abuse, accidents, family violence, bullying, and mass trauma. Broader approaches to promoting resilience and preventing posttraumatic problems in children at risk are also presented.

Solution-Focused Play Therapy Elizabeth Kjellstrand Hartwig, 2020-11-16 Solution-Focused Play Therapy is an essential text that blends the process of play therapy with solution-focused therapy. With a focus on child strengths and resources, this book identifies key concepts and principles in solution-focused play therapy (SFPT). The author provides neurobiological and developmental support for SFPT and guidance on how practitioners can transition from using a non-directive approach to a more directive and activity-based approach based on the developmental needs of the child. Chapters describe the 12 basic skills needed for employing this approach with children of all ages and their families. Harnessing a strengths-oriented approach, the author presents expressive ways to use key SFPT techniques, including the miracle question, scaling, finding exceptions, and end-of-session feedback. Clinicians will come away from the book with a suite of interventions, strategies, handouts, and forms that can be employed with children of all ages and their families, from strength-based assessment and treatment planning to the final celebration session.

Learning Solution-Focused Therapy Anne Bodmer Lutz, B.S.N., M.D., 2013-11-06 Solution-focused therapy is an evidenced-based practice that focuses on creating conversations that build solutions, rather than solve problems. *Learning Solution-Focused Therapy: An Illustrated Guide* teaches readers how to practice and become competent in conducting solution-focused therapy, an area of growing interest as the emphasis on brief therapy increases. Critical to the book's learning strategy is the generous use of case illustrations that are detailed, rich, and instructive without being overly

didactic. The case approach provides an effective means for seeing concepts put into practice, and since medicine is becoming more patient-focused, the solution-focused therapy model is highly relevant. Organized to show how a solution-focused interview is conducted, the book presents the basic model and goes on to apply this model in psychopharmacology, addiction, supervision and consultation. Each chapter combines readings, solution-focused questions, case illustrations, learning exercises and video demonstrations (available online), which together constitute a comprehensive course in this therapeutic modality. Moreover, the author's conversational writing style makes the tenets and techniques accessible and interesting to a wide variety of clinicians. *Learning Solution-Focused Therapy: An Illustrated Guide* will appeal to clinicians who wish to enhance their skills and support their patients' growth in a positive way.

Family Focused Grief Therapy David William Kissane, Sidney Bloch, 2002-04 To those of us who have been aware of the innovative service to families facing death and bereavement that has been developed by David W. Kissane and Sidney Bloch this book has been eagerly awaited. Their work is a logical development in the field of Palliative Care in which it has long been recognized that, when life is threatened, it is the family (which includes the patient) which is, or ought to be, the unit of care. The work also has great relevance for the wider field of bereavement care...all who work to help families at times of death and bereavement will find much to learn from this book which represents a useful addition to our understanding of the losses which, sooner or later, we all have to face. - Colin Murray Parkes Family members are often intimately involved in the care of dying people and themselves require support through both their experience of palliative care and bereavement. This innovative book describes a comprehensive model of family care and how to go about it - Family Focused Grief Therapy is an approach which is new, preventive, cost effective and with proven benefits to bereaved people. It describes a highly original and creative approach to bereavement care, one likely to revolutionize psychosocial care in oncology, hospice or palliative care and grief work. The book has been designed rather like a therapy manual, providing a step-by-step approach to assessment and intervention. Its rich illustration through many clinical examples brings the process of therapy alive for the reader, anticipating the common challenges that arise and describing how the therapist might respond. Families are recognised throughout as the central social unit, pivotal to the success of palliative care. Family Focused Grief Therapy will be of use to doctors, nurses, psychologists, social workers, pastoral care workers, psychiatrists and other allied health professionals who work in caring for the dying and for their bereaved relatives. Based soundly on a decade of internationally regarded research, this book will alter the direction of future medical practice and is destined to become a classic in its field.

Caregiver Stress and Staff Support in Illness, Dying and Bereavement Irene Renzenbrink, 2011-03-24 The need for renewal and support for those who care for seriously ill, dying, and bereaved people has been acknowledged from the very beginning of the hospice and palliative care movement. While often referring to the rewards and satisfactions of the work, Dame Cicely Saunders was the first to acknowledge that helping encounters with dying patients and distressed relatives could be a source of anguish and grief for dedicated and compassionate carers. *Caregiver Stress and Staff Support in Illness, Dying, and Bereavement* discusses the challenge of finding a balance between the support needs of patients, families, and staff and the resources available. With contributions from practitioners and researchers from around the world, this book recognizes that palliative care today is being provided in many different settings and that there may be wide variations in the way individuals and organizations identify and manage the stressors that arise through the work. This unique collection of international perspectives on the complexities and management of caregiver stress and staff support builds on the firm foundation Mary Vachon built over thirty years ago in her studies, yet broadens the scope to include significant social, political, and cultural variations on the theme.

Engaging Children in Family Therapy Catherine Ford Sori, 2012-12-06 A common question at the initial meeting of a family therapist and a new client(s) is often whether or not to include a child or children in the counseling sessions. The inclusion of a child in the family therapy process often changes the dynamic between client and therapist -- and between the clients themselves -- within the context of the counseling sessions. And yet, although this is such a common experience, many counselors and family therapists are not adequately equipped to advise parents on whether to include a child in therapy sessions. Once the child does make an appearance in the counseling session, the therapist is faced with the challenges inherent in caring for a child, in addition to many concerns due to the unique circumstance of the structured therapy.

Counseling a child in the context of a family therapy session is a specific skill that has not received the attention that it deserves. This book is intended as a guide for both novice and experienced counselors and family therapists, covering a wide range of topics and offering a large body of information on how to effectively counsel children and their families. It includes recent research on a number of topics including working with children in a family context, the exclusion of children from counseling, and counselor training methods and approaches, the effectiveness of filial play therapy, the effects of divorce on children, and ADHD. Theoretical discussion is given to different family therapy approaches including family play therapy and filial play therapy. Central to the text are interviews with leaders in the field, including Salvador Minuchin, Eliana Gil, Rise VanFleet and Lee Shilts. A chapter devoted to ethical and legal issues in working with children in family counseling provides a much-needed overview of this often overlooked topic. Chapters include discussion of specific skills relevant to child counseling in the family context, case vignettes and examples, practical tips for the counselor, and handouts for parents.
